Allowable Subject Matter

1. Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

2. Independent Claims 1, 7 and 8 are allowable because none of the prior art of record disclose an apparatus and a method for detecting a ground fault of a solar battery in a solar power generating system comprising step where AC leakage removing means remove an AC leakage current component due to a capacitance to a ground of the solar battery from differential current in combination with the other claim limitations.

Claims 2-6 are dependent on allowable Claim 1 and therefore allowable.

3. It is well known in the art use of differential transformers in order to detect a ground fault or ARC condition in a power supply. A capacitance to a ground in solar type batteries creates an obstacle for reliable detection of a ground fault inside a solar battery of solar power generation system, because an AC leakage current may be falsely interpreted as a ground fault. Applicants describe an apparatus and a method of removing AC leakage current from ground fault detection mechanism that allows analyzing only DC component of a current produced by the solar battery. Prior Art (Nouyoshi Takehara

Art Unit: 2836

P.N. 6,101,073) indicates an importance of differentiating a real and a false ground fault event in solar cell power generating in order to prevent unnecessary disconnection of a solar battery due to erroneous ground fault detection. One of known methods was method wherein upon detecting a ground fault a disconnecting operation was delayed for a predetermine time, but the method have some disadvantages - with a short delay erroneous operations could occur, with a long delay the protection effect was compromised. Patent 6,101,073 disclosed a variation of delay method wherein a microcontroller continuously analyzing if a ground fault detected at different time intervals. In that method the protecting operation is performed in two stages, i.e., ground fault protection is performed provisionally and fully. None of the prior art of record disclose or recommend a removal of an AC leakage current as a method for avoiding an erroneous operation.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
